## EDUCATION

### Imperial College London/Royal College of Arts

Masters in Innovation Design Engineering (Human Computer Interaction)

London, MSc/MA

Aug. 2025 – May 2027(Expected)

### National Institute of Fashion Technology

Communication Design

Bangalore-India, B.Des

Jul 2017 – May 2021

## EXPERIENCE

### Bosch ADAS

Bangalore, India

#### *Experience Designer*

Jul 2023 - Aug 2025

- Unified three sensor modalities (camera, radar, LiDAR) into a single in-vehicle **hardware interface** across **multiple display sizes** by resolving conflicting signal priorities into one visual hierarchy, cutting operator error rate by **40%**.
- Mapped **50+ ADAS system functions** into service blueprints by **facilitating cross-functional workshops and building a reusable design process framework**, compressing stakeholder alignment cycles from **20 weeks to 8**.
- Designed a **real-time dashboard** surfacing 25+ computational metrics (CPU/GPU hours, API throughput, data pipeline usage) for engineering leads, applying typography and information hierarchy, exposing compute spend at tenant level for the first time and cutting cloud costs by **15% within a quarter**.
- Shipped **15+ high-fidelity interactive prototypes** for ML workflows using **AI-augmented design tooling and building a reusable prototype-to-spec design process**, reducing late-stage design changes by **30%**.

### Honeywell Forge (Worker Assist/Sustainability+)

Bangalore, India

#### *UX Designer*

Jul 2022 - Jul 2023

- Built a **shared visual reference** frame across HMT hardware and desktop, letting remote experts **annotate onto the operator's live view**, **eliminating the miscommunication that delayed inspections** and establishing a **multimodal interaction** between voice and visual annotation.
- Anchored a **cross-platform design system to a 30mm head-mounted display** by designing component at the smallest surface (typography, spacing, and accessible colour palettes), cutting design-to-development revision rounds by **50%**.
- Designed real-time sustainability dashboards around five operator-controllable metrics by filtering out signals operators couldn't act on, so every number on screen mapped to a decision in the next shift, driving a **15% gain in operational efficiency** post-release.

### Publicis Sapient

Bangalore, India

#### *Experience Design Researcher*

May 2021 - Jul 2022

- Reframed **digital workflow redesigns** across B2B and B2C platforms by **triangulating qualitative interviews with behavioral analytics** to surface the real friction points, driving a **21% gain in task completion** validated through pre-launch usability studies.
- Reversed a stakeholder product decision mid-project by bringing user session recordings into the room and pairing them with the team's behavioral assumptions, **redirecting the product roadmap** on evidence.

## TECHNICAL AND DESIGN SKILLS

**Visual Design Craft:** Typography, Colour Theory, Composition, Layout, Accessible Design, Visual Storytelling, Illustration

**Interaction/Experience Design:** Interaction Flows, Micro-interactions, Motion Design, High-Fidelity Prototyping,

Wireframing, User Flows, Design Systems, Multi-platform and Cross-form-factor Design

**3D/Physical Prototyping:** Blender, Fusion 360, Rhino, CAD Modelling, Rapid Prototyping, Physical-Digital Systems

**Tools:** Figma, FigJam, Adobe After Effects, Adobe Illustrator, Adobe Photoshop), Sketch, Maze, Miro

**Research/Strategy:** User Research, Usability Testing, Systems Thinking, Stakeholder Workshops, Behaviour Analytics,

Gen-AI Augmented Design

## PROJECTS

### Open AI, Art as an Emotion (Meadow Mobile App) | *Multimodal Interaction · HAI · Gen AI · Accessible Design*

- Designed a community art-therapy platform with **AI-generated daily prompts** as the engagement loop, taking gesture, motion, facial expression, and audio as input for users who couldn't or didn't want to engage in words.
- Built the social architecture around **art as the shareable object**, where weekly creations are posted via QR code into a community feed, **replacing comment dynamics with response-through-making**.

### R-P-S TOSSLY, Cyber Physical Systems | *Python · Machine Learning · Physical-Digital Prototyping · Motion Design*

- Built a **gesture-controlled** rock-paper-scissors scoreboard reading hand poses through a camera and rendering scores on 15 servo-driven seven-segment digits, with a mechanical music box for wins. End-to-end build across computer vision, embedded motor control, and mechanical assembly.
